

# 29TH INTERNATIONAL SYMPOSIUM ON VLSI DESIGN AND TEST (VDAT-2025)

VLSI Design and Semiconductor Technology for Next Gen Chips & AI Applications

7 - 9 AUGUST 2025

HOTEL SHIVALIK VIEW, SEC-17, CHANDIGARH, INDIA

## CALL FOR TUTORIAL

The Organizing Committee of the VDAT 2025 invites proposals for tutorials to be presented at the conference, scheduled for 7-Aug-2025 in Chandigarh.

Tutorials are a cornerstone of the VDAT Conference, providing a unique opportunity for experts to share their knowledge on cutting-edge research, emerging technologies, and practical applications in the field of VLSI design and related areas. We welcome proposals for 90 minutes (1.5 hours) and half-day (3 hours) tutorials covering both academic and industrial topics. Proposals can range from established areas of research to emerging trends, providing fresh insights or novel solutions that will benefit attendees from academia and industry alike. The topics for the tutorials can be in-line with the theme and tracks of the VDAT2025 conference but need not be limited to them. Tutorials may be submitted for different formats like presentations, workshops, discussions, demonstrations or audience engagements or a mix of the above. The tutorials will be conducted in offline format this year, with the chance to interact directly with participants during breaks, exhibit booths, and post-event discussions.

We look forward to receiving your tutorial proposals and seeing you at The International symposium on VLSI Design and Test, 2025!

## SUBMISSION INFO

Complete details: <https://vdat.org.in/callfortutorials>

Submit a single PDF containing all the information listed below.

1. **Title** : Title of the tutorial, limited to 20 words
2. **Duration**: 1.5 hours/ 3 hours
3. **Name of the Speaker(s)**
4. **Format of the Tutorial**: Presentation/Workshop/Demo/Discussion/Other
5. **Abstract**: Clearly outlining the intent of the tutorial (Between 600 and 1000 words)
6. **Domain of the Tutorial**: Does it align with any track in the conference. Please note that the tutorial need not be limited by the tracks listed.
7. **Keywords**: Provide at least 5 keywords
8. **Learning Outcomes**: Please list at least 3 major learnings for attendees
9. **Target audience**: Does it cater to any particular group of attendees like students, or corporates with certain Experience level
10. **Prerequisite knowledge of the audience (If any)**: Does the attendee need to have any prior knowledge to understand this tutorial?
11. **Speaker's Biography**: Qualification, experience, other conference presentations or publications in similar domains showcasing speaker's expertise. Please provide a biography of each speaker (limiting to 300 words each). 1.5 Hour format tutorial can have a maximum of 4 speakers.
12. **Basic Structure of the Tutorial**: Topics and Subtopics with time allocated to each topic, also indicating the portions covered by each presenter.
13. Any IT or other requirement for conducting the tutorial.
